

SanitiBox

SANITISATION TUNNEL

SANITIBOX: SANITISATION TUNNEL

Reconverting the production and thanks to our thirty years' experience, we have achieved the **SanitiBox**, a self-supporting tunnel with **automatic sanitising and sterilising system**.

We have done what we do best: to use our business skills to find a solution that can guarantee greater security for all of us.

THE FUNCTION OF SANITIBOX

SanitiBox is an easy-to-install steel tunnel that acts as a **passage in front of the entrance to any building: supermarkets, schools, public offices, factories, shops, hotels, etc.**

With the passage inside the tunnel, the sanitisation of clothing and surfaces is guaranteed before entering the buildings and, in the same way, exiting the buildings.

Sanitisation occurs when people or trolleys (or other objects and goods) pass through the tunnel.

The SanitiBox with sanitisation system is equipped with a nebulisation system.

A sensor detects the presence of people or things and the sanitising liquid contained in a special tank - integrated in the lower part of the side panel-is vaporized through the nozzles.

Among the options we provide a tank equipped with a trolley. Through a special lance it is possible to sanitise the internal rooms and indoor spaces.

The transportable tank with the sanitising liquid can

be brought inside the buildings and be used to disinfect work environments tanks to the lance.

The **SanitiBox with sanitisation system** was designed to allow the passage of **only one person** at a time, in order to regulate the access.

The ease of installation and minimal aesthetics make it a pleasant complement to the façade of any building (historic buildings or modern constructions).

SANITIBOX INCLUDES:

- Structure in hot-dip galvanized and powder-coated steel frame, with 40 different colours available.
- Top Cover membrane in fireproof PVC which can be customized with 30 different colours.
- Side panels in fireproof PVC, complete with SanitiBox logo.
- Motion sensor (touchless activation sensor).
- Box containing: pumping system, electronics, timer, tank kit and liquid level control.

Sanitising spray system integrated into the structure consisting of:

- High pressure nebulizer circuit, with stainless steel pipes ;
- Easy-to-clean nozzles in nickel-plated brass: the aerosol supply is silent and produces a very fine atomisation.

OPTIONS

- Levelling drainable WPC platform, with integrated collection tank on the floor.
- Sanitising box for shopping trolleys.
- Decontamination mat.
- Touchless dispenser for hand sanitiser gel.
- Transportable tank kit + lance: nebulising system to sanitise rooms.
- Led lighting kit IP 55 integrated on the upper perimeter of the SanitiBox.
- Contactless body temperature sensor.
- Customisation of the PVC side panels with logo.
- Sanitising liquid *

***Sanitising liquid certifications**

The system designed for the passage of the person is thought for spraying a sanitising and detergent cleanser.

The sanitising liquid detergent recommended by Sprech srl specifically for spraying "in the presence" of people, in compliance with the safety standards of business and commercial activities, meets the following characteristics:

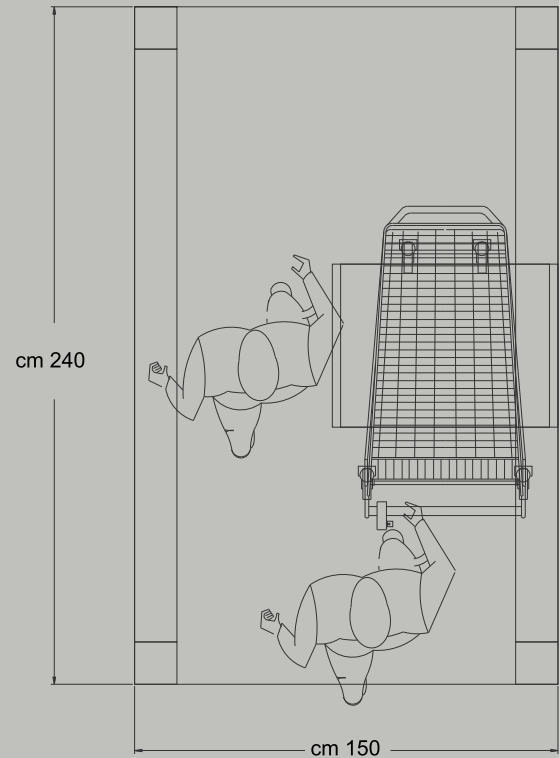

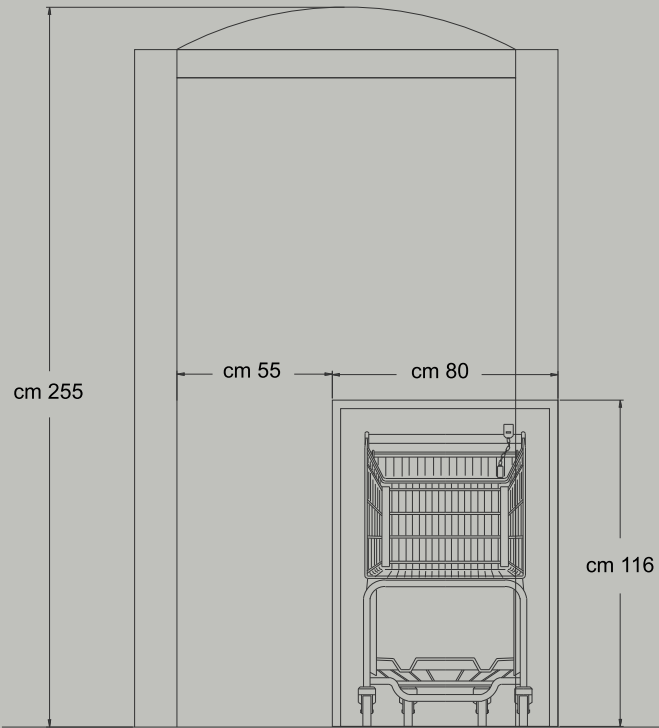

- Fast reaction time;
- High stability of the active principle;
- Dermatologically tested on people;
- No dangerous substances according to (EG) CLP-VO1272/2008

Proven sanitising efficacy : tests performed by a German institute according to EN ISO 11737-1.

Proven sanitising efficacy through nebulisation : tests performed by a German institute.

SanitiBox with sanitisation for people only

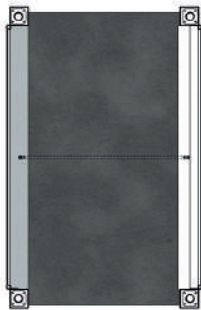

typology

1

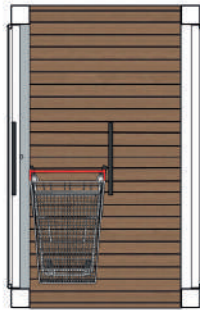

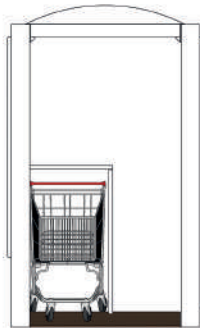

**SANITIBOX FOR
PEOPLE ONLY**

2

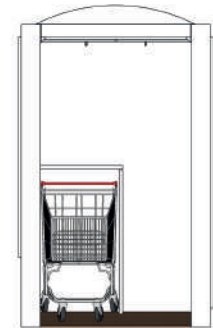

**SANITIBOX FOR
GOODS ONLY**

3

**SANITIBOX FOR
PEOPLE AND GOODS**

1

SanitiBox Tunnel - 1 (for people only)

- Tunnel cm150x240 (structure in hot-dip and powder-coated steel frame + PVC top cover + side bars + adjustable footplates.)
- n°2 PVC side panels + SanitiBox logo
- Sanitising system: tank, pumping system, electronics, protection box, circuit, 8 nozzles, sensor.

€ 6.060**OPTIONS**

Levelling drainable platform, with integrated collection tank.	€ 670
Decontamination mat.	€ 220
Touchless dispenser for hand sanitiser gel.	€ 120
Trolley kit + lance (system to sanitise rooms)	€ 540
Sanitising liquid (a 10L jug)	€ 180
Integrated Led lighting kit IP 55	€ 1.080
Contactless body temperature sensor (estimate on demand)	on estimate
Customisation of the PVC side panels with logo(estimate on demand)	on estimate

2

SanitiBox Tunnel - 2 (for goods only)

- Tunnel cm150x240 (structure in hot-dip and powder-coated steel frame + PVC top cover + side bars + adjustable footplates.)
- n°2 PVC side panels + SanitiBox logo
- Sanitising system: tank, pumping system, electronics, protection box, circuit, 8 nozzles, sensor.
- Levelling drainable platform, with integrated collection tank.

€ 7.200**OPTIONS**

Touchless dispenser for hand sanitiser gel.	€ 120
Trolley kit + lance (system to sanitise rooms)	€ 540
Sanitising liquid (a 10L jug)	€ 180
Integrated Led lighting kit IP 55	€ 1.080
Contactless body temperature sensor (estimate on demand)	on estimate
Customisation of the PVC side panels with logo (estimate on demand)	on estimate

3

SanitiBox Tunnel - 3 (for people and goods)

- Tunnel cm150x240 (structure in hot-dip and powder-coated steel frame + PVC top cover + side bars + adjustable footplates.)
- n°2 PVC side panels + SanitiBox logo
- Sanitising system: tank, pumping system, electronics, protection box, circuit, 8 nozzles, sensor.
- Levelling drainable platform, with integrated collection tank

€ 9.370**OPTIONS**

Touchless dispenser for hand sanitiser gel.	€ 120
Trolley kit + lance (system to sanitise rooms)	€ 540
Sanitising liquid (a 10L jug)	€ 180
Integrated Led lighting kit IP 55	€ 1.080
Contactless body temperature sensor (estimate on demand)	on estimate
Customisation of the PVC side panels with logo (estimate on demand)	on estimate

The above mentioned prices are net prices; no discount granted. VAT not included.
 Transport not included. Additional costs for transport : estimate on demand.
